

## TRAINING COURSE

### CHEMICAL LABORATORY SKILLS FOR QUALITY ASSURANCE AND CONTROL

## University of Malawi- Chemistry Laboratories (Zomba)

**6-10 November 2023**

**Fees: K400,000 per person (excludes  
accommodation and travel cost)**

### Target Participants

This course is developed for chemical analysts with a minimum qualification of Diploma in Laboratory Science and two years experience in a laboratory. Participants must be involved in day to testing activities in their institution. Analysts with other qualifications and extensive experience may be considered on a case by case basis.

### Course description

This course is designed to provide improved testing skills for institutional laboratory analysts and supervisors in the chemistry analysis laboratories. It aims to contribute to the acquisition of skills necessary to ensure that laboratories meet required standards for quality results at all times. The course will be conducted through theory presentations and practical sessions using latest analytical equipment for chemical testing.

### Benefits to your organisation

Institution analyst with skills that ensure consistent generation of reliable testing results for accurate decision making.
